

HIGHLINE STUDENTS CAN'T AFFORD TO WAIT

Vote YES on Propositions 1 and 2 by Tuesday, November 3

Every Highline student deserves a safe, healthy school and reliable technology that supports learning.

Propositions 1 and 2 address aging middle schools, critical building repairs, cybersecurity, dependable school technology, and systems students, families and staff rely on every day.

Failing to address these needs now leaves students without today's safety and learning advantages, allows buildings to deteriorate, and compromises the security of student data.

PROP. 1: SAFE, HEALTHY SCHOOLS

The school construction bond would:

- ✓ Replace Sylvester and Cascade middle schools
- ✓ Rebuild and improve Chinook Middle School
- ✓ Create a permanent home for CHOICE Academy and other student programs
- ✓ Fund critical repairs and safety improvements at schools across Highline
- ✓ Create hands-on learning spaces for career and trades training

Highline has a long record of completing new schools **on time and on budget**.

A thoughtful plan, built over years by a community-led advisory group.

The projects in Prop. 1 were determined by Highline's volunteer-led Capital Facilities Advisory Committee. They spent two years studying facility conditions, priorities, and costs.

This plan is fiscally responsible. It invests in schools now instead of waiting until buildings deteriorate further and construction costs rise.

And it levels the playing field, giving every middle school student in Highline access to a modern school built to today's learning and safety standards.

PROP. 2: RELIABLE TECHNOLOGY

The technology levy would resume local funding for:

- ✓ Cybersecurity and student data protection
- ✓ Reliable internet and WiFi
- ✓ Teacher training for responsible technology use
- ✓ School-to-family communication systems
- ✓ Staff and student device replacements and maintenance

Technology doesn't replace teachers. The vast majority of classroom time is spent in direct, teacher-led instruction. Instructional software can help teachers identify where individual students need additional support.

And cybersecurity is not optional. Schools maintain sensitive student records and medical information. Student data must be protected!

Why Now?

School construction takes years to design, permit, and build. Delaying means today's students are left behind while construction and repair costs continue to rise.

Cybersecurity, communication systems, classroom tools, and technical support are everyday needs that are not fully funded by the state.

Did you know?

- The bond plan was developed in a transparent, public process led by community members.
- Highline has delivered new schools on time and on budget for decades.
- Bond funds can only be used for voter-approved capital purposes.
- Technology supports teachers. It does not replace teacher-led instruction.

Highline students have waited long enough.

VOTE YES ON PROPS. 1 AND 2 BY NOV. 3.

Safe Schools. Reliable Technology. Prepared Students.
